EXPERIENCE

Part-time programming instructor

Logiscool Hungary | Hungary Baja | 2018 - now

- Teaching basic programming concepts and languages (e.g., StageScript, it is a Javascript language optimized for educational purposes) in a playful way for elementary and middle school children
- Supported the students in project development and creative thinking

PROJECTS

Car rental service V2

[github](#) | [Webpage](#)

Car rental app for desktop built with React, using MySQL to store data

- Implemented JWT authentication, and password encrypting to improve security
- Saved data in MySQL server
- To access the user panel, you can create an account, it will not ask you to verify it, so you can create a user using imaginary email, or use **FirstUser@FirstUser.com**, and password **FirstUser1234**

Car rental service

[github](#) | [Webpage](#)

Car rental app for desktop built with React

This project runs on github, if you refresh the page, it might break the website

- Managed app state and inter-process communication with React hooks
- Integrated third-party components from Tailwind for elegant UI/UX
- Saved data locally in JSON using local storage
- To access the admin panel, use the username "admin"

Feed-Net

[github](#)

Restaurant finder app

- We created the app with REST API and Angular for the design and operation of the user interface
- The data was encrypted on a MySQL server

SKILLS

Frontend: JavaScript, React, Angular, HTML 5, CSS 3, Bootstrap 5, Tailwind

Backend: Node, Express, REST API, MySQL

Tools: Git, Agile
